SUNDAY SCHOOL HYMN

NO NOT ONE

There's not a friend like the lowly Jesus—

No, not one! no, not one!

None else could heal all our soul's diseases—

No, not one! no, not one!

No friend like Him is so high and holy—

No, not one! no, not one!

And yet no friend is so meek and lowly—

No, not one! no, not one!

CHORUS

Jesus knows all about our struggles,

He will guide till the day is done;

There's not a friend like the lowly Jesus—

No, not one! no, not one!

PSALM 100:1-5

“Make a joyful noise unto the Lord, all ye lands.

Serve the Lord with gladness: come before His presence with singing.

Know ye that the Lord He is God: it is He that hath made us,

and not we ourselves; we are His people, and the sheep of His pasture.

Enter into His gates with thanksgiving, and into His courts with praise:

be thankful unto Him, and bless His name. For the Lord is good;

His mercy is everlasting; and His truth endureth to all generations.”

What Is Diabetes?

Diabetes is a medical condition that affects the body's ability to process sugar. People may have prediabetes and diabetes for several years before the onset of symptoms. There are a few classifications of diabetes based on certain conditions:

- Prediabetes
- Type 1 Diabetes
- Type 2 Diabetes
- Gestational Diabetes

Type 2 diabetes (the most common type) develops when the body is resistant to insulin, which is produced by cells in the body. This causes an increase in insulin levels and eventually an increase in blood sugar. Type 1 diabetes differs in that the body's immune system causes cells that produce insulin to die, resulting in a lack of insulin in the body. Regardless of the type of diabetes an individual has, diabetics are defined as having far too much glucose in their bloodstream. Diabetes is a problem because it can cause more significant threats to an individual's health in the future.

Symptoms of Diabetes

If you're not sure whether you or someone you know has diabetes, look for these symptoms. Remember, this is not a comprehensive list of all symptoms, nor should it be used to self-diagnose. If you experience any of these symptoms and think you may be at risk of having or developing diabetes, schedule a visit with your doctor to get screened for diabetes:

- Being hungry and tired regularly, even when you've had enough to eat and enough sleep
- Urinating more often and being thirstier than normal
- Having a dry mouth and/or itchy skin
- Blurred vision
- Being easily irritated
- Frequent yeast or other infections
- Slow-healing cuts or sores
- Numbness and/or pain in legs and feet
- Unintentional and unexplained weight loss
